## **1. How to Use the Application for Road Capturing**

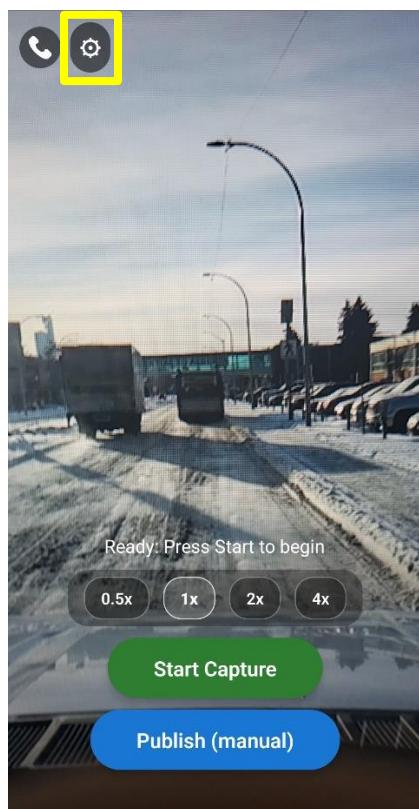

### **Step 1:**

Locate and open the application from the home screen. The application is named .

### **Step 2 (Optional):**

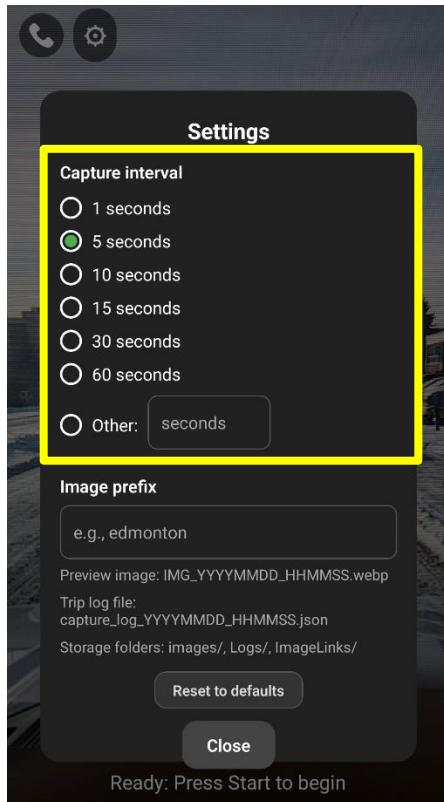

Tap the Settings icon to open the settings panel.

### **Step 2.1 (Optional):**

Adjust the capture interval, which defines the number of seconds between each captured image.

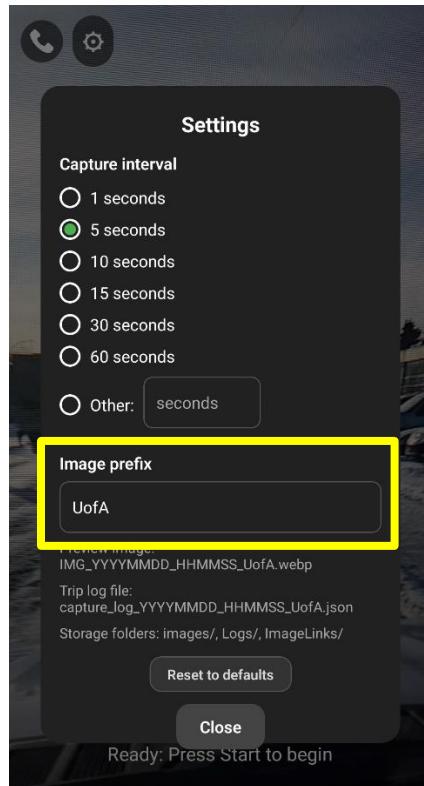

The default capture interval is **5 seconds**.

### **Step 2.2 (Optional):**

Add an image prefix, which can represent the trip name, a keyword, or the vehicle identifier.

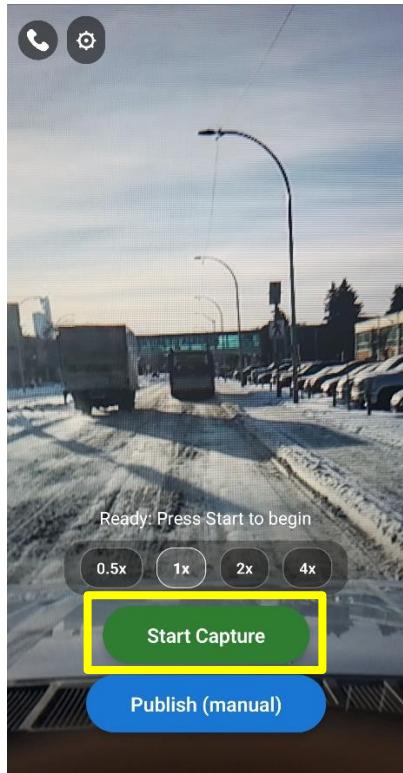

This prefix helps organize and identify captured data.

### **Step 3:**

Tap the **Start Capture** button to begin road data collection.

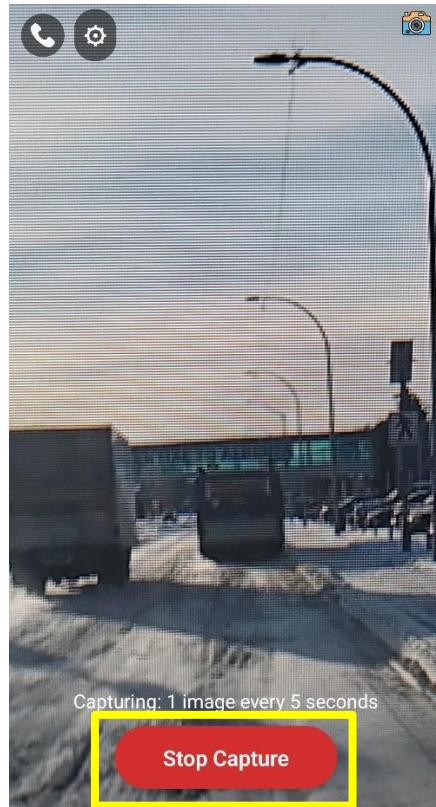

The application will start capturing images and associated data automatically.

### **Step 4:**

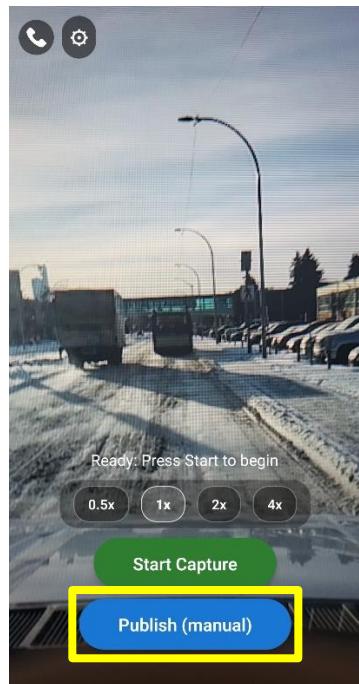

After finishing the trip and completing data capture, tap the **Stop Capture** button.

This action stops image capturing and automatically publishes the collected data to the cloud database.

**Step 5 (If the device was offline or mobile data was disabled):**

Tap the **Publish (Manual)** button to upload any missing files that were not previously synchronized with the cloud database.

## **2. How to Update the Application**

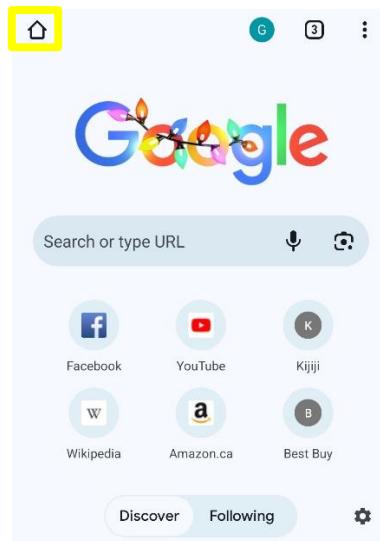

### **Step 1:**

Open **Google Chrome** from the home screen,

then either:

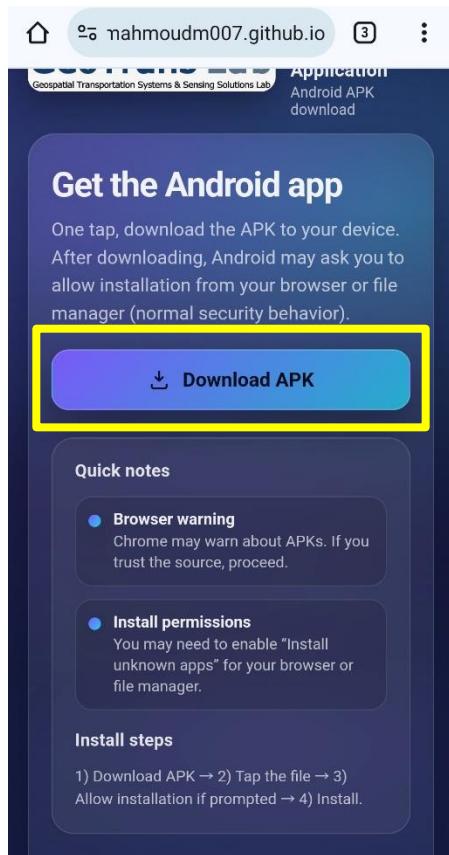

- Tap the home icon in the top-left corner, or

- Navigate directly to the following website: <https://mahmoudm007.github.io/RoadCapture-Website/>

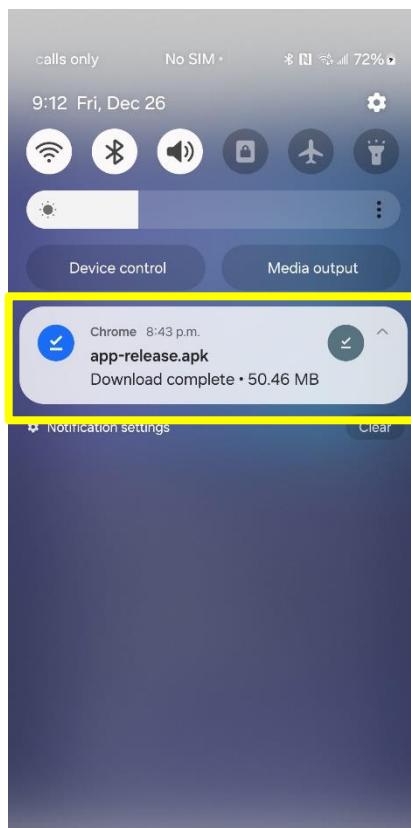

## **Step 2:**

Tap the **Download APK** button to begin downloading the latest version of the application.

## **Step 3:**

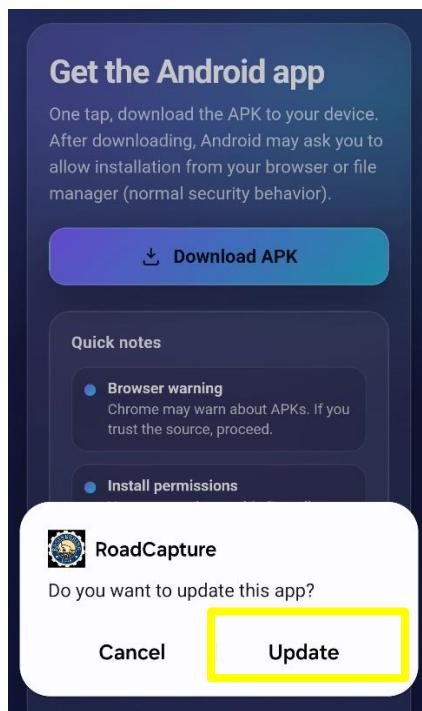

Once the APK file has finished downloading, tap on the file to open it.

#### **Step 4:**

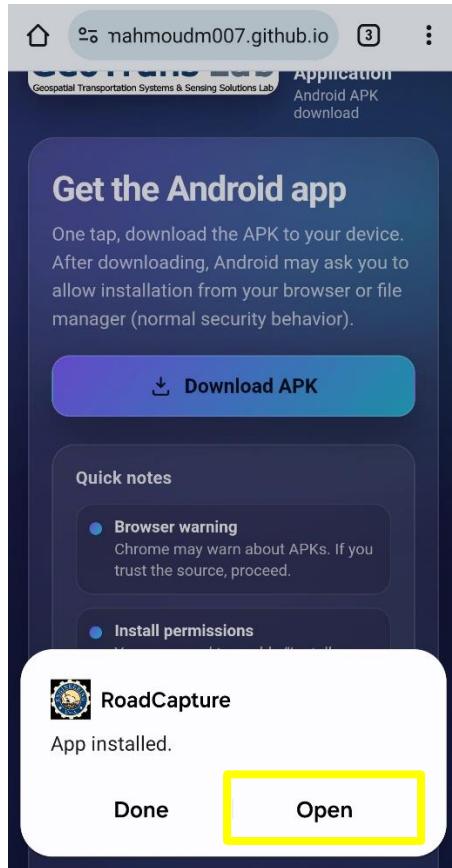

Tap the **Update** button to start the update process.

This may take a few moments to complete.

#### **Step 5:**

After the update finishes, tap **Open** to launch the application and verify that it is working correctly.

### **3. How to Get Support or Fix Application Issues**

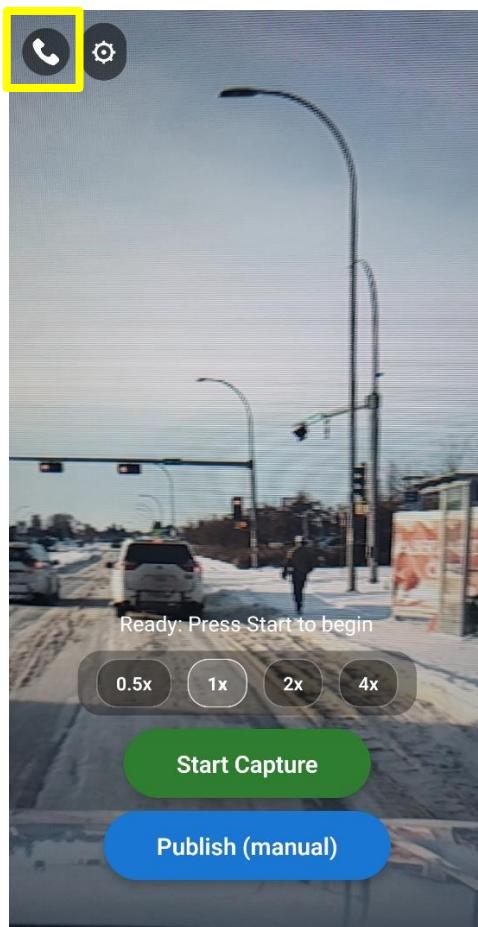

#### **Step 1:**

Locate and open the **RoadCapture** application from the home screen.

#### **Step 2:**

In the top-left corner, tap the **Contact Us** icon.

This section contains the developers' contact information, which can be used to report errors, request support, or provide feedback regarding the application.
